Parasites may be tiny, but they can cause huge problems for your Pet.

Providing year round protection kills adult fleas and controls all immature stages of fleas, keeping your home and Pet safe from infestation.

95% of the flea population is in the environment, not on the Pet.

Flea's Life Cycle

- Adults 5%
- Pupae 10%
- Larvae 35%
- Eggs 50%

- Fleas need blood to reproduce, which is why they bite.
- Fleas can grow from eggs to adults in just 14 days.
- Under ideal conditions, one pair of fleas can produce thousands of descendants.

Ask your Banfield veterinarian which FirstShield™ product, dose and regimen is right for your Pet.
